ONESOURCE × BLEUCIEL AUTOMATIONS INC.

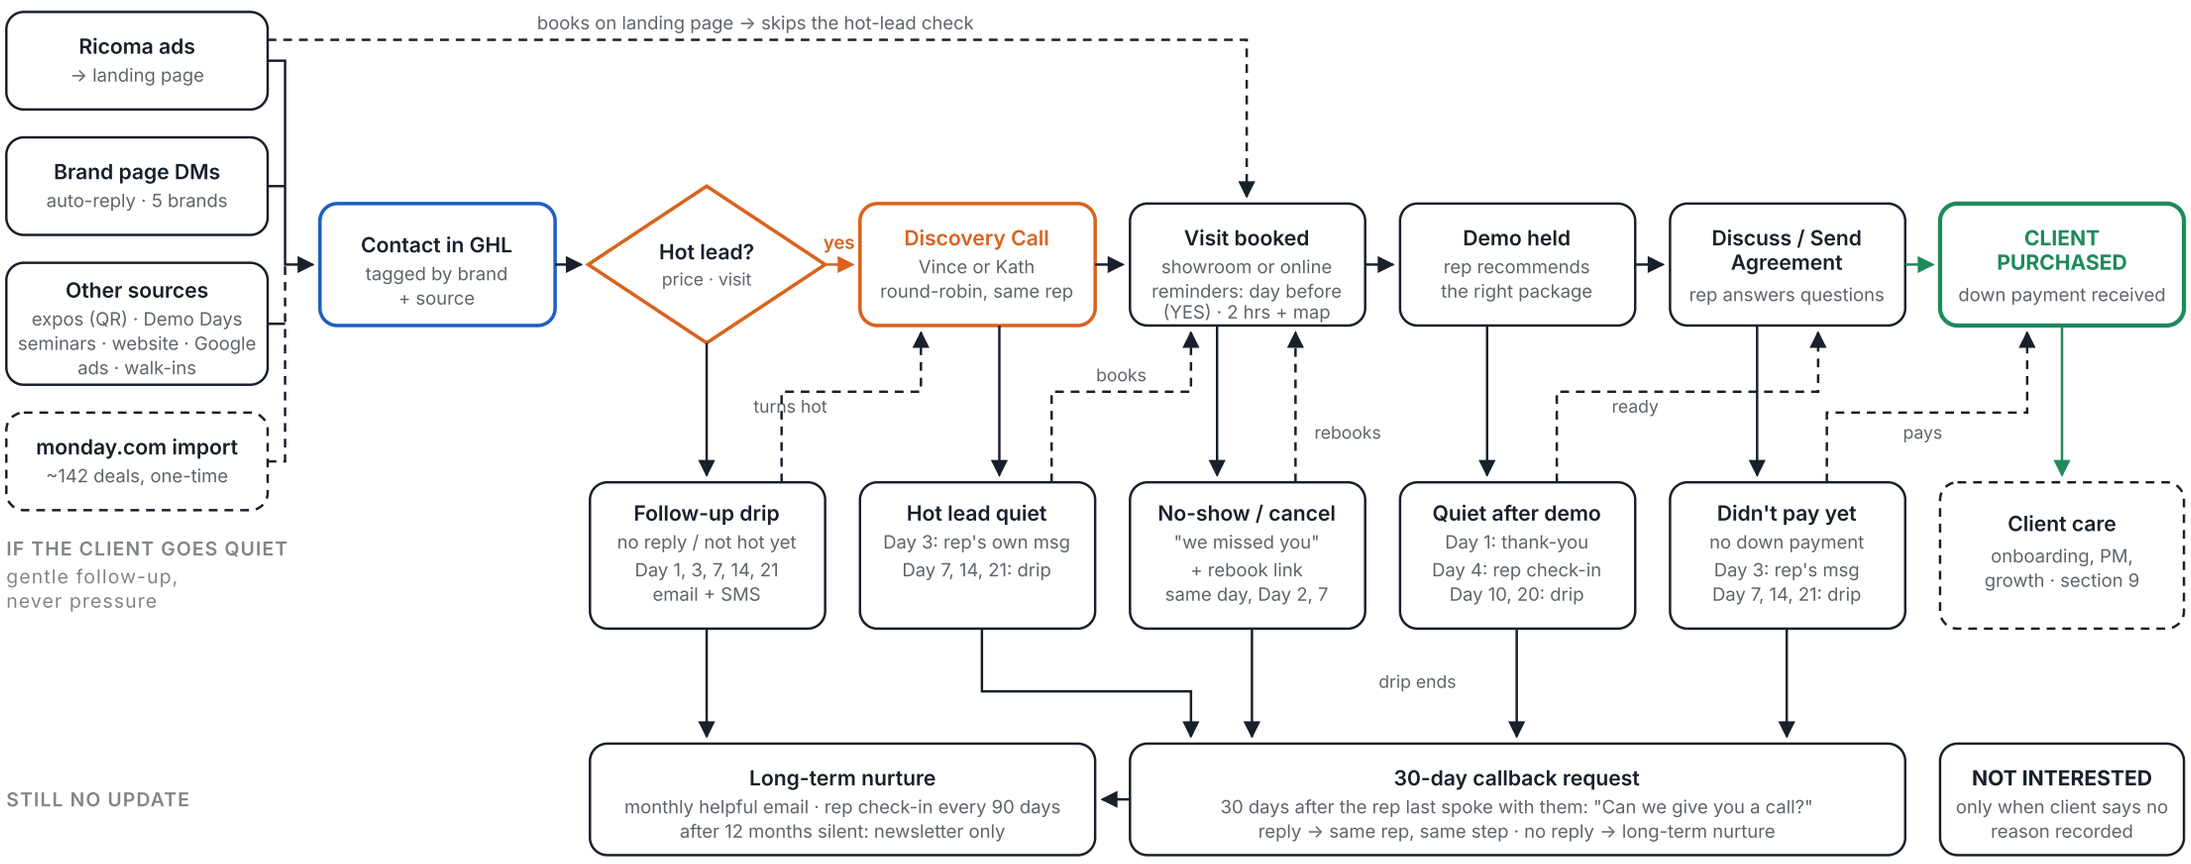

GHL Lead System — Process Map Rev 2

How every inquiry for Ricoma, SinSim, JACK, BRUCE and Bullmer moves from first contact to purchase in Bleuciel's own Salig CRM sub-account (built on GoHighLevel), and what happens at every point where a client goes quiet. Rev 2 includes Bleuciel's Rev 1 changes (6 Nov) and the full client-care program.

Ref OSP-26002 / OS-C-26002 | Rev 2 · 11 Nov 2026 · for sign-off | Platform: Salig CRM sub-account

1 End-to-end overview

The top row is the path to a sale. Under each step is what happens if the client goes quiet, and the dashed arrows show where they return when they respond. Every follow-up is gentle and spaced out, because buying a machine takes weeks or months.

Any reply returns the client to the same rep, at the step they left off. Silence is never marked Not Interested. The client gets gentle follow-up, one callback request, then long-term nurture until they're ready. "Not yet" pauses everything until the date the client gives.

2 Every scenario, step by step

Wherever a client stops, they can do one of four things: respond, ask for more time, say no, or stay silent. This table shows where the system sends them in each case.

WHERE THE CLIENT STOPPED	WHAT THE SYSTEM DOES	CLIENT RESPONDS → NEXT STEP	"NOT YET"	SAYS NO	STILL SILENT AT THE END
New lead never replies first message, no answer	Follow-up drip Day 1, 3, 7, 14, 21 (email + SMS)	Replies → Discovery Call Books from a link → Visit booked	Pause until their date, then resume	Not Interested + reason	Long-term nurture
Replies, not hot yet chatting, no price or visit ask	Auto-reply answers FAQs, collects mobile + email, then the drip	Asks about price or a visit → Discovery Call	Pause until their date	Not Interested + reason	Long-term nurture
Books on the Ricoma landing page showroom visit or discovery call	Skips "Hot lead?"; rep assigned and alerted	Visit → Visit booked, reminders run Call → Discovery Call at the booked time	—	—	—
Hot lead goes quiet after the Discovery Call	Day 3: rep's own message · Day 7, 14, 21: helpful drip	Replies → rep continues Books → Visit booked	Pause; rep gets a task on that date	Not Interested + reason	30-day callback
Cancels a booked visit	Same day: "No problem, pick a new time" + rebook link	Rebooks → Visit booked, reminders again	Pause until their date	Not Interested + reason	Treated as no-show
No-show	"We missed you" + rebook link: same day, Day 2, Day 7	Rebooks → Visit booked, reminders again	Pause until their date	Not Interested + reason	30-day callback
Quiet after the demo	Day 1: thank-you + recap · Day 4: rep check-in · Day 10, 20: drip	Ready → Discuss / Send Agreement Second visit → Visit booked	Pause until their date	Not Interested + reason	30-day callback
Didn't buy yet agreement sent, no down payment	Day 3: rep's own message · Day 7, 14, 21: helpful drip	Pays → Client Purchased Wants changes → Discuss Agreement (management approval)	Saving up / waiting: pause until their date	Not Interested + reason (price, other supplier, timing)	30-day callback
30-day callback request	One message: "Can we give you a call?"	Replies → rep calls; back to the step they left off	Pause until their date	Not Interested + reason	Long-term nurture
Long-term nurture	Monthly helpful email · rep check-in every 90 days	Replies → same rep, back to their step	Pause until their date	All messages stop	After 12 months: newsletter only
Comes back after Not Interested	Deal reopens with the same rep; history kept	Discovery Call or the step that fits	—	—	—
Repair / parts / support existing client	Routed to the service team, never into a sales drip	Service flow (section 9)	—	—	—
Not a buyer job seeker, supplier, spam	Rep tags "not a lead"; removed from pipeline	No drip, not counted in reports	—	—	—

Same rep, always

A client keeps the same rep from the first message to the purchase, and again if they come back later.

"Not yet" is not "no"

For a ₱400K–₱800K decision, many clients are saving up or waiting for a partner. GHL stores their date and resumes then.

Silence is not "Not Interested"

A deal is marked Not Interested only when the client says no.

3 Respectful-contact rule

Helpful, never pressure. Every workflow is built to these limits.

Limits

- Max 2 follow-ups a week in week 1, then 1 a week (Day 7 starts week 2)
- Replies and appointment reminders don't count toward the limit
- Messages send 9:00am–6:00pm, Mon–Sat only
- Calls only when the lead agreed or asked

Stop rules

- Any reply stops the drip and moves the client to their next step, with the same rep
- "Not yet" pauses until the client's date
- "Not interested" at any step → Not Interested, reason recorded
- Buyers leave sales drips and move to client care

Automation guardrails

Automated messages never quote a price, discount or quotation. They never promise delivery dates or stock, guarantee income, approve payment terms, or give repair or technical advice.

4 Lead sources

One GHL account holds all five brands. Every contact is tagged with its **brand**, **source** and **campaign**.

BRAND	FACEBOOK PAGE	INSTAGRAM	SHOWROOM	EMAIL SENDER
Ricoma	ricomaembroideryphilippines	@ricomaembroideryphilippines	1278 Batangas St., Makati	@ricomaembroidery.com.ph
SinSim	sinsimembroiderymachinephilippines	@sinsimembroideryph	5865 Zobel Roxas St., Makati	@bleucielautomations.com
JACK	jacksewingmachines	@jacksewingmachinesph	5865 Zobel Roxas St., Makati	@bleucielautomations.com
BRUCE	brucephilippines	@brucesewingmachinesph	5865 Zobel Roxas St., Makati	@bleucielautomations.com
Bullmer	bleucielautomations (main)	none	5865 Zobel Roxas St., Makati	@bleucielautomations.com

Ricoma ads → landing page

Book a showroom visit or a discovery call. Booking goes straight to the calendar and skips the hot-lead check.

Brand page DMs → auto-reply

Messenger and IG for all brands. FAQ answers, collects mobile + email, and hands hot leads to a rep.

Other sources

Expo and Demo Day QR forms, seminars, website forms, Google ads and walk-ins (logged by the rep). Each one gets its own source tag.

5 Auto-reply & hot lead handover

A hot lead is anyone who asks for a price, a quotation, a showroom visit, an online consultation, or a person.

Greet — Brand welcome, Taglish/English → **Answer** — Approved FAQs only → **Capture** — Name, mobile, email, location → **Hot?** — Price, visit or person → **Assign + alert** — Round-robin Vince/Kath · app + SMS → **Rep takes over** — Discovery Call, drip stops

Not hot yet → FAQ answers + follow-up drip. The lead turns hot the moment they ask about price or a visit. Non-Ricoma brands: the bot asks which machine and what it's for, then hands over to a rep.

AI persona

Answers only from Bleuciel's approved knowledge base and FAQs, in Bleuciel's tone. Bleuciel tests it and approves it before launch. Buttons, conversational AI, or both — to decide

24/7 agreed 3 Nov

The bot answers and sends booking links around the clock. Handover to a person happens 10am–3pm, and after hours it sends a holding message.

Safety net agreed 3 Nov

If a hot lead hasn't been answered in about 15 minutes during hours, the other rep and Ken are alerted.

6 Booking & reminders replaces Calendly

Calendars

- Showroom visit: 30 min · Discovery call / online: 30 min
- Mon–Sat, 10:00am–3:00pm, other times by arrangement
- 30-min buffer · no daily limit · round-robin
- The same rep keeps the client

Reminders

- Confirmation right after booking
- Day before: reply YES to confirm
- 2 hours before: map / video link
- Cancel → same-day rebook message · No-show → same day, Day 2, Day 7

7 Pipeline & fields

Every deal ends in one of two places: **Client Purchased** when the down payment is received through a Salig Pay invoice link (balance due before delivery), or **Not Interested**, only when the client says no.

New Lead → **Discovery Call** → **Visit Booked** → **Demo Held** → **Discuss / Send Agreement** → **Client Purchased**

No-Show — rebook flow → **Long-term Nurture** — after callback → **Not Interested** — reason required

Side stages. "Not yet" pauses are a date field plus a tag, not a stage, so the deal stays at its step.

Every deal

Lead source · campaign · brand · owner (rep) · stage · next step · machine of interest · Metro Manila or province · new or existing business · what they'll produce · timeline to buy · space · preferred channel · "not yet" date · client background notes

At purchase / at loss

Purchase: machine model, units, why they bought.
Not Interested or "not yet": the reason.

8 Reporting to Management & Marketing

One GHL dashboard, reviewed monthly.

Top of funnel

Inquiries by source and campaign · inquiries by brand

Activity

Follow-ups done on time · demo requests · show rate

Results

Conversion · sales by brand and units · pending vs. purchased vs. Not Interested

9 Client care after the sale: Bleuciel Care

Every machine gets a welcome, check-ins, a next-service date with automatic reminders, and a business consultation every 6 months. Care and repairs come from the Client Care Specialist and the service team. Offers, the Care Plan, the coupon and upgrades come from the same sales rep.

Onboarding: first 30 days

Day 0 · Welcome — What to prepare; balance due before delivery → **Delivery + setup** — After full payment; 3-day setup + checklist; trainer field report → **+7 days** — First-week call: running well? any questions? → **Day 30** — Check-in, feedback form, review + testimonial request

First year: warranty and relationship

Month 6 — How's the business? Any issues? (no PM yet) → **Month 10** — Care Plan offer: PM starts after Year 1, save up to 20% → **Month 12** — Anniversary business review + ₱15,000 machine coupon → **Year 2+** — Same rhythm repeats every year

Year 1 is under warranty: service and repairs are covered, and the client pays the technician's fare. When the warranty ends, the CRM sets the first PM date automatically.

Preventive maintenance · every 6 months from Year 2

- 2 weeks before: PM reminder + booking link
- Not booked after 7 days: Client Care calls to schedule
- Day before: reminder with technician and time
- After the visit: written service report + 1-question feedback
- Next PM date set automatically, +6 months (far provincial: yearly)

Growth · every 6 months from Year 2

- Business consultation, 2 weeks after the PM visit if there was one (Month 12 review counts as the first)
- Growth signal: full capacity, turning down orders, wants caps, older model
- Upgrade talk → new deal, same rep, tagged "Repeat buyer" → back to Discovery Call
- Not now → next consultation in 6 months. No hard selling.

Service requests · anytime

- Client messages via Messenger, Viber or call, with photos or video
- Free online consultation first; fixed online = no charge
- Can't fix online → on-site repair at Service Menu rates + fare (Year 1: warranty covers the repair)
- Written repair report; 7-day repair warranty
- Retraining and digitizing booked from the Service Menu

Marketing assets · monthly

- Showroom demo, setup and training: photos and video
- Day 30 review and Month 12 success story, only with the client's permission
- Admin and Management send them to the Marketing Team monthly; tracked as a KPI

Always on for every client: free phone and video help for life, holiday greetings, and a monthly tips newsletter. Existing owners join at their current step. Prices follow Bleuciel's approved Service Menu.

10 Build phases

Everything on this map is in scope. Bleuciel's additions are covered by a change request to contract OS-C-26002. The work is built in two phases, so the sales system goes live first.

Phase 1 · Sales system + basic client care

- Salig CRM setup, users, FB/IG for all five brands
- Landing page (visit or discovery call)
- AI auto-reply, qualifying questions, hot-lead handover, 15-min safety net
- Calendars, reminders, cancel and no-show flows
- Pipeline, fields, "not yet" pause, same-rep reopen, Not Interested reasons
- Down payment by Salig Pay invoice link
- Every follow-up scenario in section 2, incl. 30-day callback and long-term nurture, under the contact rules
- Source tagging: expos, Demo Days, seminars, website, Google ads, walk-ins
- Service routing and "not a lead" tagging
- Management & Marketing dashboard
- Basic client care: welcome, delivery check-in, maintenance reminders, holiday and promo messages
- monday.com import · training · handover

Phase 2 · Full Bleuciel Care program

- Full onboarding timeline (section 9)
- Warranty tracking, PM cycle, Care Plan offer and renewals
- Anniversary review, ₱15,000 coupon, growth consultations, upgrade deals
- Service request flow with Service Menu
- Marketing asset collection and monthly handoff
- Client Care and service team users

Phase dates and fees are set in the change request. Third-party costs stay with Bleuciel: AI usage, Salig Pay fees, any Viber integration, and extra user seats.

11 Needed from Bleuciel

Once we have these answers and your sign-off on this map, we start the build.

1	**Single final approver:** Ken or Aimee
2	**Viber:** SMS for the callback request, or a Viber integration (a third-party cost)
3	**Agreements:** sent and signed inside Salig CRM, or outside it
4	**Landing page:** one shared page or one per brand, plus logos, colors and fonts
5	**Salig Pay details** for the down-payment invoice link
6	**Bot inputs:** knowledge base / FAQs, hot-lead qualifying questions, bot style (Bebob AI profile as reference), after-hours wording
7	**Notification scope:** every new lead, or hot leads and bookings only
8	**Users:** names and roles for Aimee, Client Care, the service team and management
9	**Client care inputs:** welcome copy, Service Menu, Care Plan terms, coupon terms
10	**Still pending:** monday.com walk-through + CSV export, sender emails + domain auth, SMS number, Business Manager access, access for website and Google ads
